Sclavo, as a reference partner for the clinical laboratory with a strong experience in In Vitro Diagnostics, offers a new line of reagents devoted to the study of haemostasis, able to respond to the growing demands for standardization and analytical/diagnostic quality for the coagulation laboratory.

Sclavo’s commitment and attention embrace the study of thrombotic risk as well as the monitoring of anticoagulant drugs, aiming at providing reliable and innovative products.

**ADVANTAGES**

- Complete line for the diagnostic screening and special tests
- Clotting, chromogenic and immunological methods
- Applications developed for use on automated coagulation systems
- High stability
- Products available in different kit sizes
A FULL RANGE OF PRODUCTS

ROUTINE REAGENTS
- PT
- APTT
- Fibrinogen
- AT III
- Thrombin Time
- D-Dimer

THROMBOPHILIC
- Protein C Chromogenic
- Protein S Clotting
- Factors
- Factor II
- Factor V
- Factor VII
- Factor VIII
- Factor IX
- Factor X
- Factor XI
- Factor XII

UNDER DEVELOPMENT
- DRVVT (screening and confirm)

CALIBRATORS
- Calibration Plasma
- % PT/Direct INR

CONTROLS
- Normal Plasma
- Abnormal Plasma
- D-Dimer - Low
- D-Dimer - High
